Ecoforest VAP boilers use advanced software to control the flow and return temperatures, removing the requirement and cost of an anti-condensation valve. This boiler can also operate without a buffer tank, further reducing installation costs. Combustion settings are constantly self-regulating to provide the perfect mix of fuel and oxygen at all times, ensuring high efficiency and reliability and cleaning is fully automatic.

KEY FEATURES

- Self-regulating: auto adjusts to chimney & fuel
- Anti-condensation system - no valve required
- Wi-fi/smartphone control & remote diagnostics
- Automatic heat exchanger & burnpot cleaning
- Multiple safety sensors and alarms
- Ash compactor - less ash removal
- External, removable ashtray box
- Control of DHW tank, buffer and hoppers
- Includes pump, expansion tank and safety valve
- Full technical aftersales & maintenance
- 5-year warranty *
- Maintenance contract available

* Subject to a maintenance contract, otherwise standard 2 year warranty applies
